

Make an Origami Puppy!

Origami is the Japanese art of folding paper into shapes. Have your grown-up help you cut out a square on a piece of paper (or use any square piece of paper) and then follow the instructions to make your own origami puppy! It might take practice, but keep trying! You'll get it!

Make your square paper

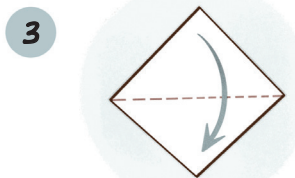

1 Fold down a corner of your rectangle until the top edge lines up with the right side of the paper.

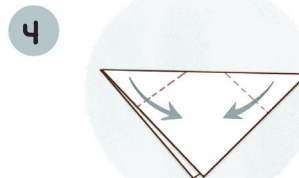

2 Cut off the piece that is sticking out below the folded section.

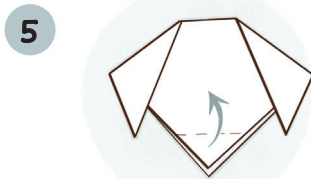

Make your puppy

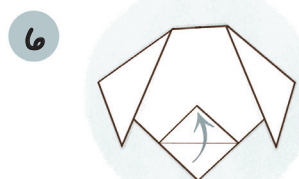

3 Turn your square so that a corner is pointing straight up. From the top, fold the square in half.

4 Fold the left and right corners down to make the ears.

5 Fold the bottom corners up to make a nose.

6 Draw a face on your puppy!
